- Moshify

The Web Developer Bootcamp 2024

- Colt Steele

OBJECTIVE

As a passionate BSc Computer Science student, I'm committed to leveraging technology for societal good. Proficient in HTML5, CSS3, JavaScript, and advancing in ReactJS, I specialize in creating visually appealing, responsive interfaces.

With expertise in Git and GitHub, I excel in collaborative coding environments. Eager to immerse myself in the tech world, I prioritize continuous learning. My goal is to contribute meaningfully by developing innovative solutions to real-world problems, making a positive impact on society.

WORK EXPERIENCE

Front-End Developer Intern

PhoxHost

September 2023 - current / Southampton, England

- Assisted the development team in maintaining different customers' websites.
- Implemented front-end technical solutions to meet project requirements.
- Received comprehensive training in Git version control as a vital skill for managing and collaborating on code projects.
- Instructed in refining code semantics and utilizing various technologies, including preprocessors like SCSS, to enhance development efficiency and code maintainability.
- During my time as a Front-End Developer Intern, I was instructed on using Figma to create mockups, enabling me to visualize and design user interfaces effectively.
- Contributed to the development process by creating new components and seamlessly integrating them into the website, enhancing its functionality and user experience.
